+

The Dangerous, Horrifying World of the Internet

What you don't know may harm you

- Viruses
- Cyber bullying
- Theft – identity and monetary
- Jail
- Kidnapping/Predators

Case Study

All completely true and documented

- Jake, 2012 - UK
- Angela, 2014 - California

+ How to Protect Yourself

- Never post personal information
- Never meet anyone that you first “met” online
- Always check with your parents before you post anything online, especially pictures and videos
- Never respond to mean or rude messages or emails
- Never share your password with anyone
- Never download or install software without checking with parents
- Always use privacy settings on social media
- Always tell an adult with someone is wrong

+ Smart Surfing

- Check your mood
- Try to remain as anonymous as possible
- Think carefully before creating an email address or user name

+ Other Things to Consider

- Cyberbullying
 - ignore and report, don't respond

- Email
 - Spam – not just annoying

- Devices
 - Passcodes

- Virus Protection software
 - don't open things from people you don't know

+ Legal Issues

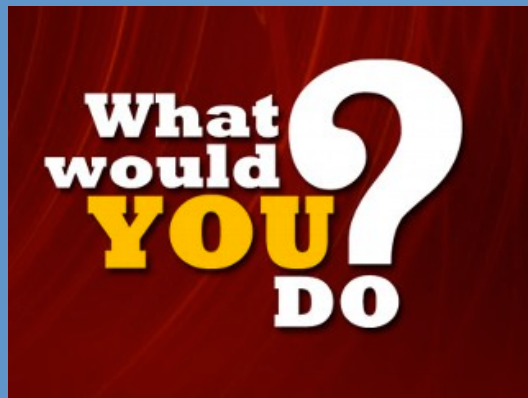

- Children's Online Privacy Protection Act of 1998
- Student Harassment Prevention Act
- Accountability

What Would You Do?
